

BA (Hons) Early Years - N104

Course Code X420/Institution Code W73)

If you are only applying for one course which is at Wirral Met, you can apply online. If you are applying for more than one course outside of Wirral Met, you must apply via UCAS.

The aim of the programme is to produce informed, equipped and professional graduates. The degree programme, validated by the [University of Chester](#), is focused on the methods, techniques and academic understanding of early childhood care to enable graduates to apply their acquired skills to the profession.

Graduates will be able to critically assess the learning needs of children and babies. They will be able to not only understand and meet these needs but promote and champion the importance of this. The programme has a cultural, diverse and inclusive set of values at its core. From a legislative and historical view point, graduates will understand the debate and context of discrimination and prejudice, working to ensure all children and babies have access to an inclusive learning environment. The programme aims to produce graduates who recognise the moral and ethical values needed to promote equality and respect for all babies and young children, as well as in the workplace.

This will be achieved through a programme that is structured to encompass core areas of understanding such as child development, the family and community, legislation and professional practice, developing research and pedagogy, as well as the personal attributes graduates need to be successful in the workplace.

This BA Early Years degree is taught at our multi-million pound [Twelve Quays campus](#) in

COURSE DETAILS

Year 1: 120 Credits

At level 4 students will be introduced to child development in an ecological context. Economic, environmental and the role of the family are all considered for their implications on practice. Pedagogical approaches are also researched and evaluated to develop a clear understanding of theory in relation to practice. Professional skills are established through the Developing Practice module which enhances students' personal qualities such as team working, problem-solving, presentation. Skills employers want from graduates. Safeguarding is at the forefront to ensure students have a good working knowledge of legislation, multi-agency co-ordination, professional standards and the limitations of these, in order to meet the needs of babies and young children.

- Safeguarding and Protection in the Early Years (20 credits)
- Fostering Positive Relationships (20 Credits)
- The Importance of Play in the Early Years (20 Credits)
- The Developing Child (20 Credits)
- Developing Practice in Early Childhood (20 Credits)
- Study Skill — Communication in Early Years (20 Credits)

Year 2: 120 Credits

At level 5 students will build on the professional skills attained at level 4, they will research and critically evaluate the changing face of childhood in the context of historical, health, welfare, education, sociology and psychology. Students will also gain critical knowledge and understanding of the political and cultural links between ethics and ideology in the care of babies and young children.

- Diversity and Inclusive Practice (20 Credits)
- Children's Health and Well-being (20 credits)
- Enabling Environments (20 credits)
- The Changing Face of Childhood (20 credits)
- Powerful Communicators (20 Credits)
- Developing Effective Practice in Early Years Settings (20 credit)

Year 3: 120 Credits

At level 6 students will secure their skills and confidence to analyse the theory, philosophies and value systems that underpin the profession. The independence and resilience required for the professional graduate to transition to employment will be supported through Leadership and Management in Practice. Students will reflect upon their own leadership, support of parents and children and their collaborative practice with other professionals. Students will demonstrate their understanding of theoretical principles, pedagogy by using creative approaches to working with children and babies and the application of ethics through extensive and thorough research into early childhood.

- The Early Childhood Professional (20 credits)
- Contemporary Issues in the Early Years (20 credits)
- Principles and Pedagogy in Early Childhood (20 credits)

- International Perspectives in Early Childhood (20 credits)
- Dissertation (40 credit)
