

T Level Programme - Health - J232

Please note applications for September 2024 are now closed. Applications are now open for courses starting in 2025.

The T Level in Health will equip you with the essential skills and knowledge to work in the Health sector, including providing insight into this dynamic sector.

Wirral Met is pleased to offer this new qualification which builds on our extensive experience of delivering Health courses in collaboration with employers and industry experts. In partnership with a number of NHS Trusts and healthcare providers, our programme ensures you will develop a real insight into the range of roles and services within this field. Your industry placement, alongside an employer set project and other activities will provide a strong basis to progress your career in this important sector.

T Levels are equivalent to 3 A Levels and their respective UCAS points, meaning that you can go into skilled employment or higher-level technical training or degree study in the health sector.

At Wirral Met you will be given the opportunity to specialise in either Supporting the Care of Children and Young People or Adult Nursing.

COURSE DETAILS

The purpose of the level 3 technical qualification is to ensure students have the knowledge and skills needed to progress into skilled employment or higher level technical training relevant to the T Level. The technical qualification is split into 2 component parts:

Core component:

- route core component (Year 1)
- pathway core component (Occupational specialism in year 2) sector, including:
 - Working in the Healthcare sector
 - Scientific and clinical practice
 - Core science concepts: human biology and physiology
 - Providing person-centred care
 - Health and wellbeing
 - Safeguarding
 - Diseases and disorders of the human body

The specialist component Supporting the Care of Children and Young People, includes:

- Assisting the treatment of children and young people
- Providing support for children and young people prior to and after clinical and therapeutic treatments
- Supporting families, parents and carers to meet these needs of children and young people

The specialist component Adult Nursing, includes:

- Assisting an adult nursing team with clinical tasks
- Supporting individuals to complete daily living activities
- Assisting with the care and treatment of skin conditions

You will also develop the essential healthcare sector skills of:

- Communication
- Team working
- Reflective evaluation
- Researching
- Presenting
- Occupational specialism options:
 - Supporting the Adult Nursing Team
 - Supporting the Mental Health Team
 - Supporting the Care of Children and Young People
- Students will only complete one occupational specialism
- The occupational specialisms provide students with knowledge and skills required to enter employment or further study in the specific occupational area.
